

Cyber Security Education Workshop for School Teachers

UWEcyber are delighted to offer school teachers the opportunity to attend a series of Cyber Security Education workshops, hosted at UWE Bristol.

The workshops are designed to help educators reflect on how they are teaching cyber security in schools, and how they can develop practical hands-on experiments that they could run in their classrooms. UWE academics will help upskill teachers on related cyber security topics and help them to curate activities they can deliver in the classroom.

The workshop is supported by the National Cyber Security Centre (NCSC) as part of their Academic Centres of Excellence in Cyber Security Education programme.

Workshops will be held on Monday afternoons at UWE Frenchay campus, from 2pm-5pm, starting on **17th January 2022**. Funding is available to cover supply teacher costs to enable participants to attend the sessions. Whilst we can offer the opportunity of online participation, we strongly encourage teachers to attend in person to benefit from networking and face-to-face delivery. Participants of the workshop will work towards the development of classroom activities for teaching cyber security, that they will showcase as part of an event to be held with UWE and NCSC later in the year. Participants will also need to demonstrate how they will share their learning outcomes with other colleagues in their school, in the interest of achieving maximum reach from the workshop.

- Date: 17th January 2022
- Time: 2pm-5pm
- Venue: UWE, Frenchay Campus, Bristol, BS16 1QY.

A limited number of places are still available. Please register your interest at the following link: <https://forms.office.com/r/SxnutK65Wg>.
